

Parascript[®] BPO Accelerator Program

Parascript for Business Process Outsourcers

Parascript reduces BPO document processing costs and improves operating margins. We provide the world's leading ICR platform as part of our unique end-to-end partnership to help you grow your profitability and stay competitive.

THE ACCELERATOR PROGRAM

The Parascript Accelerator Program for select BPOs means process automation at no cost and no risk to you. We get paid based on accurate data from our partner's actual cost savings. Our value is proven prior to payment and software performance guaranteed throughout our partnership.

LEVERAGE YOUR TECHNOLOGY

Parascript focuses on performance improvement. We can work with your technologies and workflows, leveraging our significant experience using patented technologies to increase performance of your existing software.

CONFIGURATION & TUNING

Services for Implementation, configuration and accuracy tuning down to the field level using statistical sampling are part of the engagement. No staff or budget allocations are necessary.

PERFORMANCE MAINTENANCE

Parascript monitors and maintains the performance of the implementation to ensure no degradation of performance over time.

IMPLEMENTATION REFINEMENT

Continual refinement of the implementation by Parascript so that we maximize automation and reduce manual processes. As partners, we are incented to consistently find new ways to reduce costs.

Parascript for Business Process Outsourcers

The Parascript Accelerator Program for select BPOs is centered around a shared alignment process, which provides you with guaranteed cost reductions that fund the entire program. Simply put, Parascript only gets paid after you realize real cost reductions.

BUSINESS GOAL ALIGNMENT

Our business goal alignment supports ongoing maintenance and improvements that ensure you continuously increase your profitability by further reducing data processing costs.

EXCELLING BEYOND BASIC LICENSING

Excelling beyond a basic license with add-on services, the Parascript Accelerator Program for select BPOs provides a long-term partnership where software performance is maintained and further improved over time regardless of changes in document format or quality. Parascript re-tunes software to deal with changes in document layouts, additional data extraction, or changes in image quality or source.

IMMEDIATE RETURN ON INVESTMENT

Unlike most ICR software adoption that takes 6-18 months for ROI with the software performance often degrading over time, our BPO partners experience immediate and sustainable cost savings. Parascript eliminates the burden of document analysis, rules design, and accuracy verification, ensuring that the end result is optimized high-quality data extraction for you.

UNPARALLELED EXPERTISE

Apart from the unique win-win approach of the program, Parascript is uniquely equipped with the experience and skills necessary to improve your operating margins. From large-scale projects where Parascript reduced annual costs by over a billion dollars to supporting some of the largest financial institutions in the world with check processing saving tens of millions of dollars annually, Parascript brings its deep technical knowledge combined with process experience to aid our partner with the most complex document processing challenges.

PROJECT START

Upon project start, the Parascript team takes on the supporting role of project management, analysis, and development of the proof of concept and evaluation report so that you continue operations as usual. The result is a coordinated, compact and precise project. Upon completion, the BPO reviews the results and can implement optimized or new technologies with the Parascript team's full support.
